Also included in the report are similar data for federal government employees in Montana.

Employment and wages are totaled according to county, private ownership, government and industry.

DEFINITIONS

COVERED EMPLOYER

To be a covered employer, an employer must meet one or more of the following criteria:

- have an annual payroll which exceeds $1,000 in a calendar year
- acquire all or a substantial portion of a covered business or
- be subject to FUTA

If the employer is an agricultural entity, the employer must pay total cash wages of $20,000 or more in a calendar quarter or employ 10 or more workers in 20 different weeks in a calendar year to be covered.

A domestic employer who pays total cash wages of $1,000 or more in a calendar quarter is a covered employer.

In addition, if the agricultural or domestic employer has another business which is covered, the employer must also report its agricultural or domestic employees, regardless of the amount of wages paid or number of employees.

COVERED EMPLOYMENT

Covered employment includes all services performed for wages or under contract, unless specifically excluded by law.

Some common exclusions from covered employment are:

- individuals in the employ of son, daughter or spouse
- children under 21 employed by parent (or partnership of parents)
- real estate, insurance and securities salespeople paid solely by commission and without guaranteed earnings
- fulltime students working in a program taken for credit
- inmates working for a state correction or custodial institution
- elected public officials
- railroad employees
- church employees
- children under 18 delivering and distributing newspapers or shopping news from house to house and business establishments
- physically or mentally impaired individuals working in a rehabilitation facility

STANDARD INDUSTRIAL CLASSIFICATION (SIC CODE)

Each business is assigned a (SIC) code that describes the business based upon its nature-of-business in accordance with the Standard Industrial Classification Manual, 1972 edition.

ESTABLISHMENT
Employment for a given month is the number of workers covered under the Montana unemployment insurance laws who earned wages from a reporting unit during the pay period which includes the 12th day of the month.

GROSS WAGES
Gross wages, as reported on the quarterly contribution report of employers covered by the unemployment insurance law, are the total amount of compensation paid by the employer during the quarter.

DISCLOSURE RESTRICTIONS
Publication of employment and wage data is withheld for any industry level which consists of fewer than three reporting units or in which are single establishment accounts for 80 percent or more of the industry's employment.

AVERAGE WEEKLY WAGE (AWW) is derived from the total wages of all reported employees of any industry or major group, the average monthly employment for that industry or group during the week of the 12th of each month and the number of weeks in the quarter.

Average Weekly Wage is affected by large bonuses, overtime, pay premiums, part-time employment, commissions, etc. These may drastically raise or lower the statewide or county level figure.

AWW is given as a statistical figure which can be used with current employment data to evaluate and better understand the economic position of an industry or major group.

It is not the size of the average employee's paycheck.

FOURTH QUARTER, 1988, IN REVIEW

One third of the employers covered by unemployment insurance are surveyed each year to determine that they are properly classified by:

1. Standard Industrial Classification (SIC), a code that signifies the type of product or service produced by the business;
2. county, with each business assigned a three-digit code according to the county it is located in; and
3. ownership, under which a business can fall into one of four catagories - federal government, state government, local government or private. If the business is a government agency, it falls into one of the government classifications. Otherwise, if the business is owned by a private citizen, it is classified under private ownership.

This year, the industry groups surveyed were Agriculture, Mining, Construction and Manufacturing. Some of these industries experienced major changes because one or more of the three codes were changed. Changes to SIC, county or ownership codes are made if the employer indicated the business has changed or if the original code was in error.

Virtually all industry groups are affected in some way since businesses may be moved into or out of the industry group when changes are made to the classification of a particular business. The impact of the change is determined by the change in employment and wages in each industry group (SIC), county or ownership.

Changes are made to first quarter data only, but the impact of those changes may be evident throughout the year, especially when data are compared to previous years.

EMPLOYMENT & WAGE COMPARISON GRAPHS

The graphs on the following pages (by major industry group) compare employment and wages for the years 1984, 1985, 1986, 1987 and 1988.

Note that seasonal industries in Montana include agriculture, forestry and fisheries; construction; manufacturing (due to logging); real estate, and services (due to the tourist trade). Also, there is a large drop in government employment during the summer months when public schools are closed.
